Multiscreen

Technogym Teambeats allows segmenting training experiences also by visual stations. Thanks to the Multiscreen, the visual space can offer differentiation based on the design of the space and the work specifications prescribed for each station.

The multiscreen option allows you to split and customize the user guide on the different stations having for each station more details on the following exercises.

The multiscreen feature is also the perfect solution for dedicated rooms with a complicated layout or obstacles in the way, such as pillars or dividers.

With the distribution of the screens and the visual guide of the stations, the users are constantly accompanied throughout the training, focus the attention of each exercise in the exact place and moment.

The configuration of the screens is defined from the intelligent class creator when the class is created from CRM MyWellness after complete the following set up.

TEAMBEATS

Requirements for MultiScreen Configuration

- MyWellness Kiosk
- Technogym Teambeats. Active license.
- External screen. Minimum 2 units.
- MyWellness connection to internet network (Ethernet recommended).
- Connection of MyWellness Kiosks to the external screen via HDMI.
- Chromecast 4K device. Following model serves as an example: <https://www.jbhifi.com.au/products/chromecast-with-google-tv-4k>
- It is necessary to have 1 Chromecast device for each screen that is not directly linked to the MyWellness Kiosk. Ex: 3 screens: (2 Chromecast). These devices must be connected to the same WiFi network. To ensure its power supply, each device must also have a USB cable connected directly to the electrical plug.

NOTES:

- In CHAIN mode, those programs that have been previously created in single screen mode will not be able to distribute classes in multiscreen mode. You will need to create NEW programs with the **MULTISCREEN setting option** on Class Content Builder.
- Locations that support multi-screen mode can continue to project single-screen sessions through an HDMI splitter. With this device, this unique visual will be projected on all available screens.

Multiscreen Configuration with ChromeCast

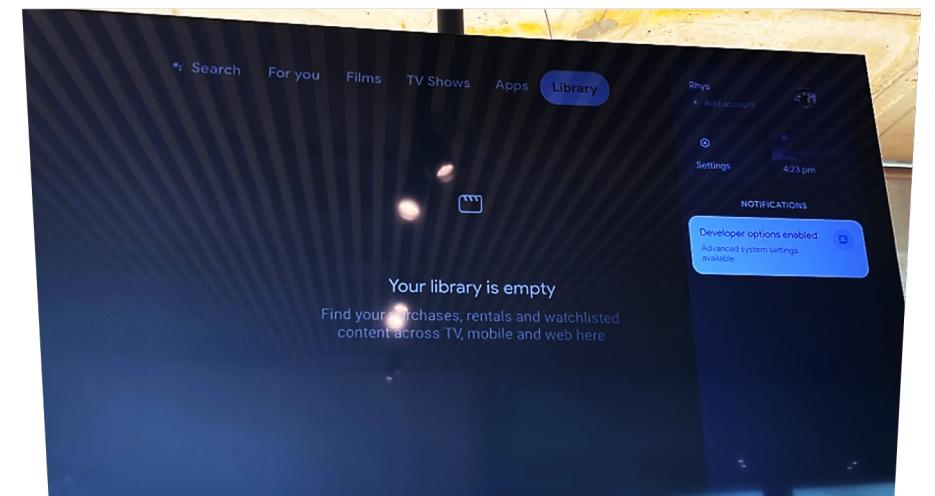

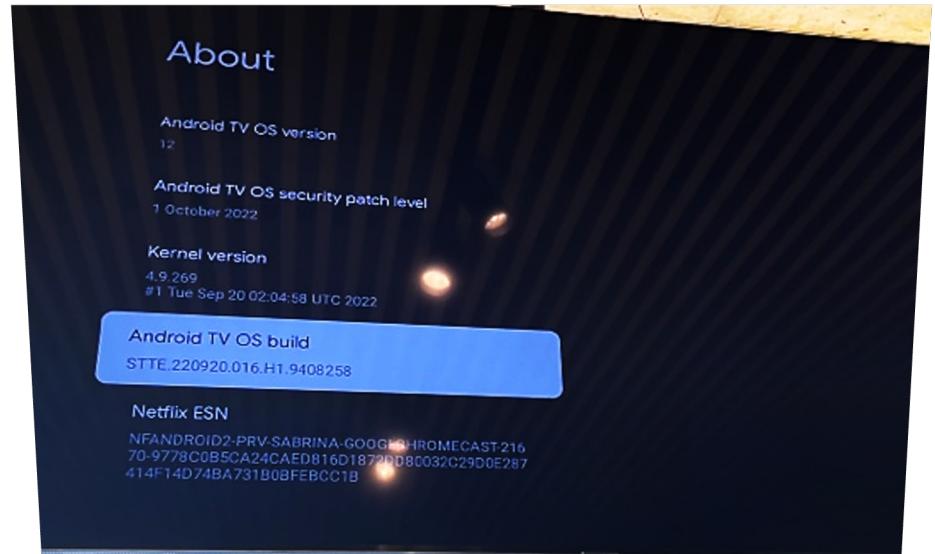

Multiscreen mode can be enabled by configuring a Chromecast device (previously purchased) by performing the following steps:

PRE Settings :

Create a Google account to be able to use only with this configuration..

Setting:

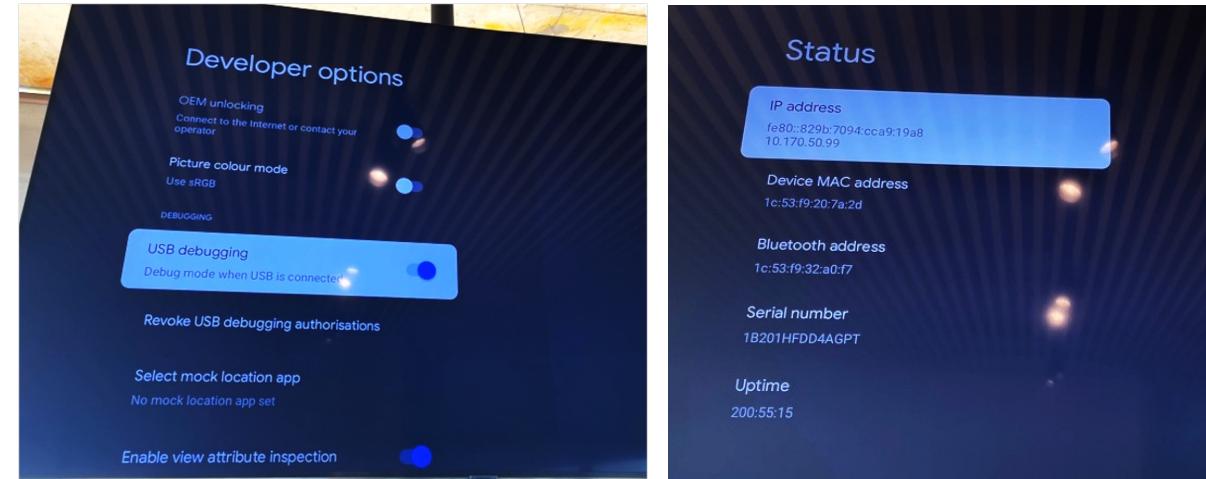

1. Connect the Chromecast to the TV.
2. The wizard will start.
3. Select the configuration language.
4. Select "TV Setup" at the bottom of the screen.
5. Connect the Chromecast device with the Wi-Fi network.
6. Once the system is connected, after a few moments it will update automatically and then it will restart.
7. Enter the login credentials of the Google account
8. Accept the terms and conditions and go to remote setup.
9. At the end of the configuration, the Google applications will be installed. Wait until you see the Chromecast home page.
10. Once in Chromecast, enable "developer" mode.
11. Select your profile at the top of the screen_ Settings _ System _ About _ Android TV _ after several clicks you will receive the message "you are a developer" on the screen.
12. Now you can access the main menu.

TEAMBEATS

Multiscreen Configuration with Chromecast

13. Activate the "Debugger/Cleaner" inside the developer tab.
14. Take the IP address of the Chromecast (you will find it in Settings _ System _ Section. Write down this IP address which you will find at the top. Ex: 10.170.168.99)
15. Go to MyWellnessKiosks and access the Technogym Teambeats APP. Press the settings tab (upper right corner). The Multiscreen installer will then open.
16. Enter the Chromecast address and press CONNECT. Wait until you get the Chromecast pairing notice and OK..
17. Press INSTALL and wait until the installation is complete.
18. Label each screen with its respective station and the name of the room that you identified in CRM MyWellness for this space where Technogym Teambeats is installed. (you can consult it in CRM MyWellness _ configuration _ Rooms). Keep the same IP address.
19. Right now you can find the app in the app section of Chromecast. Select and hold the app to move it to a location where it can be easily accessed on the Chromecast.
20. Select the multiscreen program and try starting a Technogym Teambeats session.
21. Repeat the process for each screen you want to configure.
22. Enjoy Multiscreen mode to supercharge your training sessions with Technogym Teambeats.
